# About Us

**Brilliant I.T Solution** was established in 2004, We feel great in introducing ourselves as an I.T solution house. The company was incorporated keeping in view the need of state of art, user friendly, quality based and custom made information technology solutions.

We have a strong I.T background including all type of networking, all type of Database software like supply chain management integrated with production machinery. We also deal in hardware, communication devices and provided all type of I.T solutions. We also deal in hardware, communication devices and provided all type of I.T. Solutions. We can make your business more comfortable all accessible any where in the world. You can keep your business information on your finger tips.

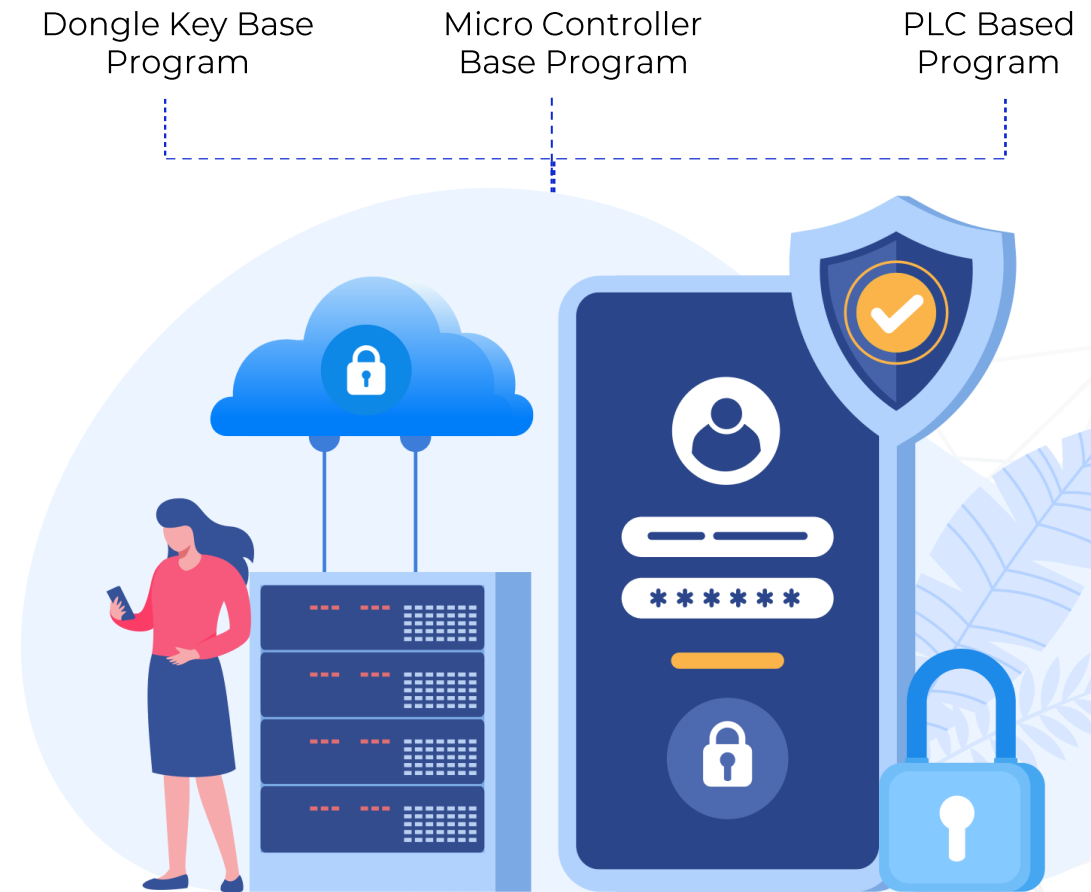

# Brilliant Assistant

BA is a universal robotic software, it is able to send information to relevant /concerned persons, it works as per your define parameters which are feed one time on it, We may take many tasks from it, like monitor overdue amount, Minimum maximum inventory levels, expenditures, capitals, assets, production, payroll amount, daily attendance, strength of staff and whatever in your mind, it can also increases your staff performance and send SMS Alert automatically to concerns as an information.

BA now able to protect your digital data (such as those in Microsoft SQL Server Databases) from destructive forces, unauthorized users / thief & also makes your staff proactive.

**BA has three type of working style with using following stuff**

# BITS WhatsApp Technology

BITS is using WhatsApp technology to encrypted your business data, Login from QR code by using mobile application.
